Notes on Academic Dress

Academic dress had its origin in the Middle Ages. When the European universities were taking form in the thirteenth and fourteenth centuries, scholars were also clerics, and they adopted robes similar to those of their monastic orders. Caps were a necessity in drafty buildings, and copes or capes with hoods attached were needed for warmth. As the control of universities gradually passed from the church, academic costume began to take on brighter hues and to employ varied patterns in cut and color of gown and type of headdress.

The use of academic costume in the United States has been continuous since Colonial times, but a clear protocol did not emerge until an intercollegiate commission in 1893 recommended a uniform code. In this country, the design of a gown varies with the degree held. The bachelor's gown is relatively simple with long pointed sleeves as its distinguishing mark. The gown for the master's degree has an oblong sleeve with the rear part cut square and the front part with a cutaway arc. The most elaborate academic costume is the doctoral gown with velvet panels down the front and three bars of the same material across the sleeves. The velvet is usually black, but it may be a color distinctive of a particular university.

The hood bears a still larger symbolic burden: the width of its velvet trimming designates the level of the degree; the color heralds the major field of study; and the lining identifies the institution that granted the degree. Duke University is symbolized by a lining of Duke blue with a white chevron.

The cap, originally round, is usually a square mor-tar-board and is the same for all degrees. The standard tassel for the cap is black, but the cap worn with the doctoral robe may have a gold tassel. The Duke doctoral gown is in the authentic Duke blue. The Duke University shield, embroidered in blue on white, is applied to each front panel. With this gown there may be worn a black velvet, four-pointed, soft tam with a square top and a gold metallic bullion tassel.

Mace and Chain of Office

Again at commencement, ceremonial use is made of two important insignia given to Duke University in memory of Benjamin N. Duke. Both the mace and chain of office are the gifts of anonymous donors and of the Mary Duke Biddle Foundation. They were designed and executed by Professor Kurt J. Matzdorf of New Paltz, New York, and were dedicated and first used at the inaugural ceremonies of President Sanford in 1970.

The Mace, the symbol of authority of the University, is made of sterling silver throughout. It is thirty-seven inches long and weighs about eight pounds. At the lower end of the hammered shaft is a gilt (gold-plated) pine cone. The upper end of the shaft displays the inscription Universitas Dukiana 1838. This inscription is surmounted by a short, hammered neck followed by the head which has eight flutings alternating with eight gilt ribs. Above the head of the mace, a band carries the motto of Duke University: Eruditio et Religio. The upper end of the mace is a crown of gilt laurel leaves which carries the seal of Duke University surrounded by the three symbols of the Trinity to indicate that Duke University emerged from Trinity College.

The Chain of Office of the President of Duke University is four feet long and is also made of sterling silver throughout. The main part consists of nine silver pine cones alternating with ten gilt clusters of three laurel leaves each. In the front hangs the gilt medallion with the official seal of Duke University surrounded by a laurel wreath into which are set the three symbols of the Trinity. In the back is the gilt coat of arms of the Duke family with the motto In Adversis Idem set in a sterling wreath of laurel leaves and bearing the inscription Duke.

Significance of Colors

Colors indicating fields of study and colors identifying some of the universities represented by members of the faculties of the University are:

- Arts, Letters, Humanities: white
- Business Administration: drab
- Dentistry: lavender
- Divinity, Theology: scarlet
- Economics: copper
- Education: light blue
- Engineering: orange
- Fine Arts: brown
- Forestry: russet
- Law: purple
- Medicine: green
- Music: pink
- Nursing: apricot
- Philosophy: dark blue
- Physical Therapy: teal
- Science: golden yellow
Commencement Program

Presiding

Richard H. Brodhead, President of the University

When the Wind Symphony sounds the fanfare for the entrance of the faculty, the audience and candidates will rise and remain standing through the prayer.

Processional March

Flourish for Wind Band  Ralph Vaughan Williams (1872-1958)

Candidates for Degrees
Members of the Faculty
Members of the University Administration
Members of the Board of Trustees
Members of the Platform Party

National Anthem

Nancy Cheng, Amanda Susan Cummings,
Caroline Lanier Griswold, Katherine Anne Morrison
Candidates for the degree of Bachelor of Arts

Georgia Hopkins Hoyler
Candidate for the degree of Bachelor of Science

Genevieve Marie Lipp
Candidate for the degree of Bachelor of Science in Engineering

Invocation

Samuel Wells, Dean of the Chapel

Welcoming Remarks

Remarks by a Student

David Scott Distenfeld
Candidate for the Degree of Bachelor of Arts

Conferring of Honorary Degrees

Introduction
Daniel T. Blue, Jr., Chair, Board of Trustees

Commencement Address

Muhammad Yunus

Conferring of Earned Degrees

Introduction and Presentations
Peter Lange and Deans

Concluding Remarks

Alma Mater

Sara Avari Patrick Womble
Candidate for the degree of Bachelor of Arts

The audience stands for the Alma Mater and remains standing until the platform party and the faculty leave the Stadium.

Dear Old Duke, thy name we sing. And though on life’s broad sea
To thee our voices raise, we’ll raise, Our fates may far us bear,
To thee our anthems ring We’ll ever turn to thee
in everlasting praise. Our Alma Mater dear.
—R. H. James ’24

Procession Out

Crown Imperial  William Walton (1902-1983)

“… In Beauty Bearing the Crown Imperial…”
Temple Grandin
Doctor of Humane Letters

Faculty Sponsor — Alvin L. Crumbliss
Trustee Sponsor — Janet Hill

As Temple Grandin likes to put it, she is a professor of animal science at Colorado State University and an expert in humane livestock facilities design and animal behavior who happens to be autistic. A native of Boston, Dr. Grandin was diagnosed with autism at an early age and struggled throughout her childhood as she adapted to the difficult aspects of her disorder. By the time she reached high school, she began to flourish both academically and socially under the tutelage of a mentor, her high school science teacher and support from her family. A gifted student with a photographic memory, she graduated from Franklin Pierce College and received her master’s from Arizona State University and a Ph.D. in animal science from the University of Illinois.

Dr. Grandin has traveled the globe implementing her unique design for curved livestock handling chutes, which are now in almost half of the cattle facilities in North America. She is considered an expert in flight zone and other principles of grazing animal behavior that reduce stress on animals during handling and are considered more humane.

She is also one of the leading advocates and authorities on autism—a theme she writes about in her books Emergence: Labeled Autistic and Thinking in Pictures, both groundbreaking works that changed the way that healthcare professionals and parents look at the diagnosis and treatment of autism. She is the author of Animals in Translation and Animals Make Us Human, both New York Times best sellers.

This past February, HBO aired a full-length film based on Dr. Grandin’s life. She has also been featured on NPR, BBC radio and was recently named one of Time’s “Most Influential People of 2010.” She has been honored by the American Society of Animal Science, American Veterinary Medical Association, American Society for the Prevention of Cruelty to Animals, and the Autism Society of America.
Honorary Degree Recipient

Joel Klein

DOCTOR OF HUMANE LETTERS

Faculty Sponsor — Charles T. Clotfelter
Trustee Sponsor — Marguerite W. Kondracke

Joel Klein has been chancellor of the New York City Department of Education, the nation’s largest public-school district, since 2002. He oversees more than 1,600 schools, 1.1 million students, 136,000 employees, and a $21 billion operating budget.

Mr. Klein’s effective yet sometimes controversial education-reform program, considered by many to be the most sweeping reform platform ever attempted in a major urban school system, has transformed New York schools into an incubator for achievement. His “Children First” initiative has changed the way schools operate, giving principals greater control over how they run their schools while holding them accountable for results. He has also worked to end the tradition of social promotion, increase school options, improve teacher quality and establish new support structures for struggling students and their parents. Combined, his many reforms have improved test scores and increased graduation rates. Chancellor Klein also helped found the Education Equality Project, a national organization aimed at closing the racial- and ethnic- achievement gap in public education.

After attending New York public schools himself, Mr. Klein went on to graduate from Columbia University and to earn a law degree from Harvard Law School. Before being named chancellor, he was chairman and chief executive officer of Bertelsmann, Inc., one of the world’s largest media companies, and assistant attorney general in charge of the U.S. Department of Justice’s antitrust division.

Mr. Klein once told the New Yorker that he’d long felt a “passion” about education and was indebted to the “phenomenal teachers” who schooled him in his youth. He recounts that when he first got to Columbia, the dean told him, “you should shoot to graduate in the middle of your class; you come from poverty, you didn’t go to Andover or Exeter.” Thankfully, Klein’s teachers didn’t prepare him to graduate in the middle of the class. He graduated magna cum laude and works every day to ensure that his students are taught the same lessons about success as he was.
Alasdair MacIntyre is a senior research fellow at the University of Notre Dame’s Center for Ethics and Culture and one of the most influential moral philosophers of our time. He has made prominent contributions to several fields including moral philosophy, political theory, philosophy of the social sciences, and philosophy of religion.

Among those he has influenced is Duke’s own distinguished theologian Stanley Hauerwas, who has engaged with one of Professor MacIntyre’s key arguments: that it’s not enough to do the right thing, but also to do it for the right reason. According to the MacIntyrian take on morality, truthfulness, justice, and courage are virtues that are necessary parts of any polity. But we also need to be aware of the context, the particular historical and sociological circumstances, from which those virtues arise.

Professor MacIntyre has taught at colleges and universities across the globe including Duke, where he is a Professor Emeritus of Philosophy, Oxford, Princeton, Brandeis, Boston University, Yale, Vanderbilt and Wellesley College. A native of Scotland, he earned his undergraduate degree from the University of London and his master’s from Oxford and Manchester Universities.

Reverend Sam Wells, dean of Duke Chapel calls Professor MacIntyre “quite simply the most significant philosopher of his generation.” Professor MacIntyre’s works, he adds, have “transformed the field of philosophical—and theological—ethics.”
Sir John Pendry
DOCTOR OF SCIENCE

Faculty Sponsor — David R. Smith
Trustee Sponsor — Thomas M. Gorrie

Sir John Pendry is a physicist who has had a major impact on nearly all areas of condensed-matter theory, notably in the area of x-ray scattering. Also one of the foremost innovators in the field of metamaterials, or unconventional materials which respond to light in entirely new ways, he is known for creating the first practical “invisibility cloak.” Collaborating with a team of Duke scientists, he developed a recipe for a cloak that can hide an arbitrary object from electromagnetic fields. A version of this design has been implemented experimentally to the delight of science and the science-fiction fans alike and has caught the imagination of the world’s media.

Sir Pendry earned his undergraduate, master’s, and doctoral degrees from the University of Cambridge and has taught at Imperial College London since 1981, where he is a professor of theoretical solid-state physics. In recognition of his scientific and engineering breakthroughs, he has won the Paul Dirac Medal and the Descartes Prize, both considered to be prestigious honors in his field, and is a fellow of the Royal Society of London. In 2004, Professor Pendry was knighted for his contributions to science.

As he puts it, some of his earliest memories are of his wide-ranging intellectual curiosity as applied to the mysteries of science. “I was interested in ‘why this’ and ‘how that,’ ” he recalls. “When I got to university, I quickly saw that theory, and in particular theoretical physics, enabled you to cover a lot of ground and a wide area of science.” He considers the practical applications of his work, particularly in metamaterials, to be limitless.
Muhammad Yunus is a Bangladeshi banker and economist who is considered the father of microfinance, a concept he developed—as an economics professor—of providing loans to entrepreneurs too poor to qualify for traditional bank loans. With his belief in the self-reliance of all people, he has altered the face of finance and entrepreneurship and has inspired millions worldwide to imagine their own potential.

Born in the city of Chittagong, Professor Yunus studied at Dhaka University in Bangladesh and received a Fulbright Scholarship to study economics at Vanderbilt University. He received his Ph.D. in economics from Vanderbilt in 1969 and the following year became an assistant professor of economics at Middle Tennessee State University. He later returned to Bangladesh to head the economics department at Chittagong University, but found it difficult to teach economic theory in a university classroom with the backdrop of a terrible famine in Bangladesh. This revelation spurred him to do something immediate to help those around him. He lent $27 out of his own pocket to 42 craftsmen in a little village, telling them that they could pay the money back when they could afford to. In the months that followed, he decided that there would have to be an institutional solution. Shortly thereafter he established the Grameen Bank. Today, replicas of the Grameen Bank model now operate in more than 100 countries.

Dr. Yunus has also begun to apply his bottom up strategy for banking to healthcare, having established Grameen Healthcare, a trust dedicated to establishing sustainable best practices in a broad range of healthcare services to address the health needs of Bangladesh and all of the world’s poor.

In 2006, he and Grameen Bank were jointly awarded the Nobel Peace Prize for their efforts to create economic and social development from below. His Nobel Committee’s citation said, “Every single person on earth has both the potential and the right to live a decent life. Across cultures and civilizations, Muhammad Yunus and the Grameen Bank have shown us that the poor can work to bring about their own development.”

He has served on the International Advisory Group for the Fourth World Conference on Women, the Global Commission on Women’s Health, the Advisory Council for Sustainable Economic Development, and the U.N. Expert Group on Women and Finance. Last year, President Barack Obama awarded him the Presidential Medal of Freedom, the United States’ highest civilian honor.

The Traditions of Commencement

Duke University traces its origin to 1838 when Brown’s Schoolhouse, a one-room log subscription school, expanded to Union Institute upon the uniting of Methodist and Quaker families. Commencement exercises date from 1852 when action of the North Carolina General Assembly authorized the institution to grant degrees. Throughout the years commencement exercises have varied in scope, sometimes offering as much as a week of celebration to the graduates, their families and citizens of rural Randolph County, North Carolina, the site of the predecessor institutions to Duke University. Notable ceremonies in the nineteenth century included those of 1859 when President Braxton Craven presented diplomas reflecting a name change to Trinity College, of 1877 when the first earned M.A. degrees were awarded, and of 1878 when three sisters, Mary, Persis, and Theresa Giles earned degrees, becoming the first women graduates of the College.

The leadership of President John F. Crowell, the donation of land by Julian S. Carr, and the financial assistance of Washington Duke made possible the relocation of Trinity College to Durham in 1892. Within a decade, Trinity College established a reputation for excellence. Commencement ceremonies became more formal under the direction of a College Marshal. Caps and gowns appeared, and after 1902, students received Latin honors in recognition of academic achievement. With appropriate ceremony, the college paid homage to Washington Duke, who had died in 1905, with the unveiling of his statue at the commencement of 1908.

From 1910 to 1924, President William Preston Few presided over the development of a particularly strong liberal arts college, and from 1924 until his death in 1940, he directed the successful transition to a complex research university. In December 1924, long-range planning and a lifetime of family philanthropy culminated in the public announcement of a grand design to aid higher education, hospitals, orphanages, and the Methodist Church in North and South Carolina. Acknowledging the unique opportunity for a new identity presented by acceptance of the terms of the indenture of the Duke Endowment, the Board of Trustees of Trinity College enthusiastically agreed to organize a new institution around Trinity College. The enlarged institution was to be known as Duke University in honor of Washington Duke, benefactor and father of Mary, James Buchanan, and Benjamin Newton, all friends of the college in their own way.

Based upon the solid foundation of Trinity College, the University grew spectacularly. The curriculum expanded and succeeding commencement programs noted new degrees: B.D. and M.Ed. in 1927, Ph.D. in 1928, and LL.B. in 1929. M.D. joined the list in 1932, and B.S. in Engineering in 1933, B.S. in Nursing in 1936, and Master of Forestry in 1939. In 1972 the degree of Master of Business Administration, the last curriculum recommended by James B. Duke, joined the list of degrees awarded by Duke University.

The location of the commencement exercises themselves reflects the changing nature of the University. First held in Craven Memorial Auditorium on East Campus, they were moved to West Campus in 1931 and held successively in Page Auditorium and in the outdoor and indoor stadiums. Special ceremonies at commencement have included the laying of the cornerstone of the Gothic campus in 1928, the first use of the Chapel and the inaugural carillon and organ recitals in 1932, and the unveiling of the statue of James B. Duke in 1935. The exigencies of World War II required the awarding of degrees during the year in special ceremonies in a variety of locations. President Terry Sanford pursued new ways to continue a single university-wide convocation of undergraduate, graduate and professional school students which would still maintain traditional exercises. In a unique format, baccalaureate services are offered three times, and the commencement exercises have now returned to an outdoor setting, first to Wallace Wade Stadium in 1974, to the East Campus quadrangle in 1980, and in 1984 back to the Stadium.

The Duke University Wind Symphony

The Duke University Wind Symphony, directed by Verena Mösenbichler-Bryant, is an ensemble of fifty-five undergraduate and graduate students from across the United States and around the world, and is open to all Duke students by audition. The ensemble has commissioned over twenty works, many of them entering the standard repertoire of wind bands throughout the world. The “Commencement Edition” of this weekend’s Wind Symphony is augmented by alumni and friends, including representatives from the 1950’s to the present.
Duke's stone carvings have provided a source of conjecture, amusement and even inspiration to the students, staff and visitors who have passed through this Gothic Wonderland. Photos of carvings are featured on the cover and throughout this program.

*On the cover:* One of five stone bosses located in the arcade of Crowell Tower which signify Age teaching Youth.
