COMMENCEMENT 2014
Duke University

One Hundred Sixty-Second Commencement
Sunday, the Eleventh of May, Two Thousand and Fourteen
Notes on Academic Dress

Academic dress had its origin in the Middle Ages. When the European universities were taking form in the thirteenth and fourteenth centuries, scholars were also clerics, and they adopted robes similar to those of their monastic orders. Caps were a necessity in drafty buildings, and capes or capes with hoods attached were needed for warmth. As the control of universities gradually passed from the church, academic costume began to take on brighter hues and to employ varied patterns in cut and color of gown and type of headdress.

The use of academic costume in the United States has been continuous since Colonial times, but a clear protocol did not emerge until an intercollegiate commission in 1893 recommended a uniform code. In this country, the design of a gown varies with the degree held. The bachelor's gown is relatively simple with long pointed sleeves as its distinguishing mark. The gown for the master's degree has an oblong sleeve with the rear part cut square and the front part with a cutaway arc. The most elaborate academic costume is the doctoral gown with velvet panels down the front and three bars of the same material across the sleeves. The velvet is usually black, but it may be a color designating the field of study to which the degree pertains. The gown itself, usually black like those of the lower degrees, may be of a color distinctive of a particular university.

The hood bears a still larger symbolic burden: the width of its velvet trimming designates the level of the degree; the color heralds the major field of study; and the lining identifies the institution that granted the degree. Duke University is symbolized by a lining of Duke blue with a white chevron.

The cap, originally round, is usually a square mortarboard and is the same for all degrees. The standard tassel for the cap is black, but the cap worn with the doctoral robe may have a gold tassel. The Duke doctoral gown is in the authentic Duke blue. The Duke University shield, embroidered in blue on white, is applied to each front panel. With this gown there may be worn a black velvet, four-pointed, soft tam with a square top and a gold metallic bullion tassel.

Mace and Chain of Office

Again at commencement, ceremonial use is made of two important insignia given to Duke University in memory of Benjamin N. Duke. Both the mace and chain of office are the gifts of anonymous donors and of the Mary Duke Biddle Foundation. They were designed and executed by Professor Kurt J. Matzdorf of New Paltz, New York, and were dedicated and first used at the inaugural ceremonies of President Sanford in 1970.

The Mace, the symbol of authority of the University, is made of sterling silver throughout. It is thirty-seven inches long and weighs about eight pounds. At the lower end of the hammered shaft is a gilt (gold-plated) pine cone. The upper end of the shaft displays the inscription Universitas Dukiana 1838. This inscription is surmounted by a short, hammered neck followed by the head which has eight flutings alternating with eight gilt ribs. Above the head of the mace, a band carries the motto of Duke University: Eruditio et Religio. The upper end of the mace is a crown of gilt laurel leaves which carries the seal of Duke University surrounded by the three symbols of the Trinity to indicate that Duke University emerged from Trinity College.

The Chain of Office of the President of Duke University is four feet long and is also made of sterling silver throughout. It consists of nine silver pine cones alternating with ten gilt clusters of three laurel leaves each. In the front hangs the gilt medallion with the official seal of Duke University surrounded by the three symbols of the Trinity. In the back is the gilt coat of arms of the Duke family with the motto In Adversis Idem set in a sterling wreath of laurel leaves and bearing the inscription Duke.

Significance of Colors

Colors indicating fields of study and colors identifying some of the universities represented by members of the faculties of the University are:

- Arts, Letters, Humanities: white
- Business Administration: drab
- Dentistry: lavender
- Divinity, Theology: scarlet
- Economics: copper
- Education: light blue
- Engineering: orange
- Fine Arts: brown
- Forestry: russet
- Law: purple
- Medicine: green
- Music: pink
- Nursing: apricot
- Philosophy: dark blue
- Physical Therapy: teal
- Public Health: salmon
- Science: golden yellow
Presiding

Richard H. Brodhead, President of the University

When the Wind Symphony sounds the fanfare for the entrance of the faculty, the audience and candidates will rise and remain standing through the prayer.

Vocalists listed under National Anthem

The audience stands for the Alma Mater and remains standing until the platform party and the faculty leave the Stadium.

Dear Old Duke, thy name we sing. And though on life's broad sea
To thee our voices raise, we'll raise, Our fates may far us bear,
To thee our anthems ring We'll ever turn to thee
in everlasting praise. Our Alma Mater dear.

Commencement Speaker

Martin E. Dempsey
Chairman of the Joint Chiefs of Staff

General Martin Dempsey is the 18th Chairman of the Joint Chiefs of Staff. As the highest ranking military officer in the U.S. Armed Forces, he is the principal military advisor to the President, the Secretary of Defense and the National Security Council. Dempsey assumed his current assignment on October 1, 2011.

Prior to becoming Chairman, he served as the Army’s 37th Chief of Staff. During more than 37 years of military service, he has commanded at every echelon—from platoon to combatant command across the United States and the globe. Before becoming Chief of Staff of the Army, he commanded U.S. Army Training and Doctrine Command, served as the Deputy Commander and then Acting Commander of U.S. Central Command, and spent two years in Iraq to train and equip Iraqi Security Forces.

General Dempsey’s awards and decorations include the Defense Distinguished Service Medal with Oak Leaf Cluster, the Distinguished Service Medal with three Oak Leaf Clusters, the Defense Superior Service Medal, the Legion of Merit with two Oak Leaf Clusters, the Bronze Star with “V” Device and Oak Leaf Cluster, the Combat Action Badge, and the Parachutist Badge.

Martin Dempsey received a bachelor of science degree from the U.S. Military Academy at West Point in 1974, followed by a master’s degree in English from Duke in 1984. “My time at Duke was an intellectual oasis after a long march,” Dempsey has said. “It allowed me time to broaden my perspective from the confines of military life and open it to another world, full of new ideas, viewpoints, issues and stories which helped me develop.” He also has master’s degrees in military art from the United States Army Command and General Staff College and in national security studies from the National War College and he taught in the English Department at West Point.
Honorary Degree Recipient

Carolyn Bertozzi
Doctor of Science

Faculty Sponsor: Katherine J. Franz

Carolyn Bertozzi is the T.Z. and Irmgard Chu Distinguished Professor of Chemistry and Professor of Molecular and Cell Biology at the University of California at Berkeley, an Investigator of the Howard Hughes Medical Institute, and Senior Faculty Scientist at the Lawrence Berkeley National Laboratory. Professor Bertozzi’s research interests span the disciplines of chemistry and biology, focusing on how oligosaccharides, or sugars, on cell surfaces change in response to cancer, inflammation and bacterial infection. Her laboratory uses the techniques of organic synthesis and genetics as tools to study and manipulate complex cellular processes, focusing on how these biopolymers contribute to recognition and communication between cells.

Professor Bertozzi is an elected member of the National Academy of Sciences, the National Academy of Inventors, the American Academy of Arts and Sciences, and the Institute of Medicine. Awards of note include the Lemelson-MIT Prize, the Presidential Early Career Award in Science and Engineering (PECASE), and a MacArthur Foundation Fellowship. Her teaching has been recognized with the UC Berkeley Distinguished Teaching Award and the Donald Sterling Noyce Prize for Excellence in Undergraduate Teaching. When she was named GLBT Scientist of the Year by the National Organization of Gay and Lesbian Scientists and Technical Professionals, Bertozzi said, “Hopefully people can look at me and realize that it’s okay to be open in their lives and be themselves and do great work and make contributions to the world as scientists.”

Carolyn Bertozzi received her undergraduate degree in chemistry from Harvard University in 1988 and her Ph.D. in chemistry from UC Berkeley in 1993. After completing postdoctoral work at UCSF in the field of cellular immunology, she joined the UC Berkeley faculty in 1996.
Honorary Degree Recipient

Erskine Bowles
DOCTOR OF LAWS

Faculty Sponsor: Joel L. Fleishman

A native North Carolinian, Erskine Bowles has demonstrated a lifelong commitment to public service. His successful business career led to his being named Director of the Small Business Administration and White House Chief of Staff under President Bill Clinton.

From 2005 to 2010, Bowles served as President of the University of North Carolina system—a position his predecessor Bill Friday called “the biggest job in the state of North Carolina.” After embarking on a “listening tour” of North Carolina, Bowles worked to keep tuition affordable and was a strong advocate for federal investment in research. His business acumen helped him lead the university system through the financial downturn.

In 2010, Erskine Bowles and former Senator Alan Simpson were named co-chairs of President Obama’s National Commission on Fiscal Responsibility and Reform. The Simpson-Bowles plan offered a roadmap to bring the federal budget into balance within five years and to improve the long-term fiscal outlook for the nation. Although the commission deadlocked, the ideas of the bipartisan plan continue to shape the national conversation about deficit reduction.

Bowles has served as Vice Chair of Carolinas Medical Center in Charlotte and as a Trustee of the Duke Endowment. Family illness inspired Bowles to help create an ALS Center in Charlotte and to serve as the International President of the Juvenile Diabetes Research Foundation. In 2005, he was appointed United Nations Deputy Special Envoy to 13 tsunami-affected countries in Southeast Asia. He serves on the boards of directors of Facebook, Norfolk Southern, North Carolina Mutual, and Belk, Inc., and is lead director of the board of Morgan Stanley, where his career began.

Bowles holds a B.A. from the University of North Carolina at Chapel Hill and an MBA from Columbia Business School.
Susan Hockfield has been a distinguished scholar and researcher, led one of America’s great universities, and is a prominent voice on national issues in higher education and science policy.

After receiving her bachelor’s degree in biology from the University of Rochester in 1973 and her Ph.D. in anatomy and neuroscience from the Georgetown University School of Medicine in 1979, Susan Hockfield was an NIH postdoctoral fellow at the University of California at San Francisco. She was drawn to the emerging field of neuroscience: “I had a visceral feeling of just profound curiosity and interest,” she recalls.

She spent two decades on the faculty of Yale University, where she focused her research on glioma, a deadly form of brain cancer. She began to assume university leadership roles, serving as Dean of the Graduate School of Arts and Sciences and then as Provost.

From 2004 to 2012, Susan Hockfield served as the sixteenth president of the Massachusetts Institute of Technology—the first woman and the first life scientist in that position. Under her leadership, MIT launched the MIT Energy Initiative and encouraged collaboration between the life sciences and engineering and the physical sciences. As president, Dr. Hockfield fostered partnerships with industry, promoted global expansion, and supported opportunities for women in science and engineering.

Dr. Hockfield continues to serve as Professor of Neuroscience at MIT and has been a national policy leader on energy technology and manufacturing. Elected to the American Academy of Arts and Sciences and the American Association for the Advancement of Science, she is a member of the boards of General Electric, Qualcomm, and the Carnegie Corporation of New York.
Journalist, author, and public intellectual, Walter Isaacson grew up in New Orleans, where he knew from a young age he wanted to become a “storyteller.” He joined TIME magazine in 1978 and served as political correspondent, national editor, and editor of new media before becoming editor of the magazine in 1996. He has also been chairman and CEO of CNN.

Continuing his storytelling in a different genre, Isaacson has written acclaimed biographies of Albert Einstein, Benjamin Franklin, and Henry Kissinger. His 2011 biography Steve Jobs, based on forty interviews over two years with the co-founder of Apple Computer, was an international bestseller.

For the last ten years, Isaacson has been the President and CEO of the Aspen Institute, a nonpartisan educational and policy studies institute based in Washington, D.C. He served for 10 years as chair of Teach for America and also served as the chair of the Broadcasting Board of Governors, which oversees Voice of America, Radio Free Europe and other international broadcasts. He is now the vice-chair of Partners for a New Beginning, a public-private organization that works to strengthen ties between the United States and the Muslim world. In 2012, he was named by TIME as one of the 100 most influential people in the world. Earlier this year, the National Endowment for the Humanities selected Isaacson to give the 43rd Jefferson Lecture, the federal government’s highest honor for achievement in the humanities.

Walter Isaacson earned his B.A. in history and literature at Harvard in 1974. He earned a master’s degree in Philosophy, Politics, and Economics at the University of Oxford, Pembroke College, as a Rhodes Scholar.
HONORARY DEGREE RECIPIENT

W. Delano Meriwether
DOCTOR OF SCIENCE

Faculty Sponsor: Gary G. Bennett

Delano Meriwether is best known as the head of the U.S. government’s 1976 swine flu immunization program. At age 33, he was tapped to direct President Ford’s ambitious $135 million plan to vaccinate 145 million Americans and became the public face of the campaign.

Dr. Meriwether’s path to leadership in public health began when, after just three years at Michigan State University, he became the first African American to be accepted into Duke University School of Medicine. He graduated with honors in 1967 and obtained a master’s degree in public health from Johns Hopkins University. After his internship at the Penn State Milton S. Hershey Medical Center, and his residency at Ohio State University Medical Center, he specialized in hematology and conducted research on leukemia at the National Institute of Health’s cancer research center in Baltimore. His first introduction to public service came when he was selected as a White House Fellow, which led him to begin work with the Public Health Department in 1973.

This distinguished physician has another extraordinary side to his life—as a star athlete. He decided to try sprinting for the first time at the age of 27. Without any professional coaching, he won the 100-yard dash at the AAU Outdoor Track and Field Championships in 1971 and again at the AAU Indoor Track and Field Championships in 1972. He landed on the cover of Sports Illustrated magazine, where he was celebrated as “the Baltimore blood specialist who has given indoor track a shot in the arm.” A pulled leg muscle kept Meriwether out of the 1972 Olympics.

In 1983, Dr. Meriwether began working as a missionary doctor in South Africa, inspiring him to establish the Meriwether Foundation, which operates health, agriculture, and economic programs in Africa.

diversity and inclusion initiatives, enhancing the overall educational experience for all students. This is achieved through various strategies such as fostering an inclusive classroom environment, promoting cross-cultural understanding, and incorporating diverse perspectives in curriculum development.

In conclusion, the Master of Business Administration program at the Fuqua School of Business is designed to equip students with the skills and knowledge necessary to thrive in today’s dynamic business landscape. Through a combination of rigorous academics, practical experiences, and professional networking opportunities, students are prepared to become effective leaders capable of driving innovation and leading change in their respective industries. The program’s commitment to excellence, diversity, and inclusion ensures that graduates are well-equipped to make a significant impact in the business world.

* Denotes the beginning year of service at Duke.
The Traditions of Commencement

Duke University traces its origin to 1838 when Brown's Schoolhouse, a one-room log subscription school, expanded to Union Institute upon the uniting of Methodist and Quaker families. Commencement exercises date from 1852 when action of the North Carolina General Assembly authorized the institution to grant degrees. Throughout the years commencement exercises have varied in scope, sometimes offering as much as a week of celebration to the graduates, their families and citizens of rural Randolph County, North Carolina, the site of the predecessor institutions to Duke University. Notable ceremonies in the nineteenth century included those of 1859 when President Braxton Craven presented diplomas reflecting a name change to Trinity College, of 1877 when the first earned M.A. degrees were awarded, and of 1878 when three sisters, Mary, Persis, and Theresa Giles earned degrees, becoming the first women graduates of the College.

The leadership of President John F. Crowell, the donation of land by Julian S. Carr, and the financial assistance of Washington Duke made possible the relocation of Trinity College to Durham in 1892. Within a decade, Trinity College established a reputation for excellence. Commencement ceremonies became more formal under the direction of a College Marshal. Caps and gowns appeared, and after 1902, students received Latin honors in recognition of academic achievement. With appropriate ceremony, the college paid homage to Washington Duke, who had died in 1905, with the unveiling of his statue at the commencement of 1908.

From 1910 to 1924, President William Preston Few presided over the development of a particularly strong liberal arts college, and from 1924 until his death in 1940, he directed the successful transition to a complex research university. In December 1924, long-range planning and a lifetime of family philanthropy culminated in the public announcement of a grand design to aid higher education, hospitals, orphanages, and the Methodist Church in North and South Carolina. Acknowledging the unique opportunity for a new identity presented by acceptance of the terms of the indenture of the Duke Endowment, the Board of Trustees of Trinity College enthusiastically agreed to organize a new institution around Trinity College. The enlarged institution was to be known as Duke University in honor of Washington Duke, benefactor and father of Mary, James Buchanan, and Benjamin Newton, all friends of the college in their own way.

Based upon the solid foundation of Trinity College, the University grew spectacularly. The curriculum expanded and succeeding commencement programs noted new degrees: B.D. and M.Ed. in 1927, Ph.D. in 1928, and L.L.B. in 1929. M.D. joined the list in 1932, and B.S. in Engineering in 1933, B.S. in Nursing in 1936, and Master of Forestry in 1939. In 1972 the degree of Master of Business Administration, the last curriculum recommended by James B. Duke, joined the list of degrees awarded by Duke University.

The location of the commencement exercises themselves reflects the changing nature of the University. First held in Craven Memorial Auditorium on East Campus, they were moved to West Campus in 1931 and held successively in Page Auditorium and in the outdoor and indoor stadiums. Special ceremonies at commencement have included the laying of the cornerstone of the Gothic campus in 1928, the first use of the Chapel and the inaugural carillon and organ recitals in 1932, and the unveiling of the statue of James B. Duke in 1935. The exigencies of World War II required the awarding of degrees during the year in special ceremonies in a variety of locations.

President Terry Sanford pursued new ways to continue a single university-wide convocation of undergraduate, graduate and professional school students which would still maintain traditional exercises. In a unique format, baccalaureate services are offered three times, and the commencement exercises have now returned to an outdoor setting, first to Wallace Wade Stadium in 1974, to the East Campus quadrangle in 1980, and in 1984 back to the Stadium.

The announcer for today’s Commencement ceremony is our own “Voice of Duke” Bob Harris.
Duke’s stone carvings have provided a source of conjecture, amusement and even inspiration to the students, staff and visitors who have passed through this Gothic Wonderland. Photos of carvings are featured on the cover and throughout this program.
