Notes on Academic Dress

Academic dress had its origin in the Middle Ages. When the European universities were taking form in the thirteenth and fourteenth centuries, scholars were also clerics, and they adopted robes similar to those of their monastic orders. Caps were a necessity in drafty buildings, and copes or capes with hoods attached were needed for warmth. As the control of universities gradually passed from the church, academic costume began to take on brighter hues and to employ varied patterns in cut and color of gown and type of headdress.

The use of academic costume in the United States has been continuous since Colonial times, but a clear protocol did not emerge until an intercollegiate commission in 1893 recommended a uniform code. In this country, the design of a gown varies with the degree held. The bachelor's gown is relatively simple with long pointed sleeves as its distinguishing mark. The gown for the master's degree has an oblong sleeve with the rear part cut square and the front part with a cutaway arc. The most elaborate academic costume is the doctoral gown with velvet panels down the front and three bars of the same material across the sleeves. The velvet is usually black, but it may be a color designating the field of study to which the degree pertains. The gown itself, usually black like those of the lower degrees, may be of a color distinctive of a particular university.

The hood bears a still larger symbolic burden: the width of its velvet trimming designates the level of the degree; the color heralds the major field of study; and the lining identifies the institution that granted the degree. Duke University is symbolized by a lining of Duke blue with a white chevron.

The cap, originally round, is usually a square mortarboard and is the same for all degrees. The standard tassel for the cap is black, but the cap worn with the doctoral robe may have a gold tassel. The Duke doctoral gown is in the authentic Duke blue. The Duke University shield, embroidered in blue on white, is applied to each front panel. With this gown there may be worn a black velvet, four-pointed, soft tam with a square top and a gold metallic bullion tassel.

Significance of Colors

Colors indicating fields of study and colors identifying some of the universities represented by members of the faculties of the University are:

- **Arts, Letters, Humanities:** white
- **Business Administration:** drab
- **Dentistry:** lavender
- **Divinity, Theology:** scarlet
- **Economics:** copper
- **Education:** light blue
- **Engineering:** orange
- **Fine Arts:** brown
- **Forestry:** russet
- **Law:** purple
- **Medicine:** green
- **Music:** pink
- **Nursing:** apricot
- **Philosophy:** dark blue
- **Physical Therapy:** teal
- **Public Health:** salmon
- **Science:** golden yellow

Mace and Chain of Office

Again at commencement, ceremonial use is made of two important insignia given to Duke University in memory of Benjamin N. Duke. Both the mace and chain of office are the gifts of anonymous donors and of the Mary Duke Biddle Foundation. They were designed and executed by Professor Kurt J. Matzdorf of New Paltz, New York, and were dedicated and first used at the inaugural ceremonies of President Sanford in 1970.

**The Mace**, the symbol of authority of the University, is made of sterling silver throughout. It is thirty-seven inches long and weighs about eight pounds. At the lower end of the hammered shaft is a gilt (gold-plated) pine cone. The upper end of the shaft displays the inscription *Universitas Dukiana* 1838. This inscription is surmounted by a short, hammered neck followed by the head which has eight flutings alternating with eight gilt ribs. Above the head of the mace, a band carries the motto of Duke University: *Eruditio et Religio*. The upper end of the mace is a crown of gilt laurel leaves which carries the seal of Duke University surrounded by the three symbols of the Trinity to indicate that Duke University emerged from Trinity College.

**The Chain of Office** of the President of Duke University is pictured on the front cover. It is four feet long and is also made of sterling silver throughout. The main part consists of nine silver pine cones alternating with ten gilt clusters of three laurel leaves each. In the front hangs the gilt medallion with the official seal of Duke University surrounded by a laurel wreath into which are set the three symbols of the Trinity. In the back is the gilt coat of arms of the Duke family with the motto *In Adversis Idem* set in a sterling wreath of laurel leaves and bearing the inscription *Duke*.

*The audience stands for the Alma Mater and remains standing until the platform party and the faculty leave the football field.*

Dear Old Duke, thy name we'll sing,
To thee our voices raise, we'll raise,
To thee our anthems ring
in everlasting praise.

And though on life's broad sea
Our fates may far us bear,
We'll ever turn to thee
Our Alma Mater dear.

Tim Cook is the CEO of Apple and serves on the company's Board of Directors. As chief executive, he has overseen the introduction of innovative new products and services including iPhone X, Apple Watch, iPad Pro, HomePod, AirPods, Apple Pay, Apple Music, and Apple TV 4K.

Under his leadership, Apple initiated a program to match employee donations to charitable organizations, is advancing inclusion and diversity efforts, and supports underserved schools in the U.S. where technology can have a tremendous impact. The company recently announced all of its global facilities are powered with 100 percent clean energy, and Apple is also working to help partners become more energy efficient and transition to 100 percent clean energy.

Before being named CEO in 2011, Cook was Apple's chief operating officer and was responsible for all of the company's worldwide sales and operations, including end-to-end management of Apple's supply chain, sales activities, and service and support in all markets and countries. He also headed Apple's Macintosh division. Prior to joining Apple, Cook was vice president of corporate materials at Compaq and chief operating officer of the Reseller Division at Intelligent Electronics. He also spent 12 years with IBM, ending as director of North American fulfillment.

In April, Cook was named to Fortune's World's 50 Greatest Leaders list. Apple has ranked #1 on Fortune's World's Most Admired Companies for the past 11 years, including each year he has been CEO—and was recently named World's Most Innovative Company by Fast Company.

Cook earned a BS in industrial engineering from Auburn University and an MBA from Duke University, graduating as a Fuqua Scholar in 1988. He was elected to the Duke University Board of Trustees in 2015.
Chimamanda Ngozi Adichie is a Nigerian writer whose keen appreciation for the details and discourse of modern life have won her readers around the world. She is the author of three acclaimed novels that embody realism for our global 21st century: Purple Hibiscus (2003), which was awarded the Commonwealth Writers’ Prize for Best First Book; Half of a Yellow Sun (2006); and Americanah (2013), which won the National Book Critics Circle Award for Fiction and was named one of the New York Times’ Ten Best Books of the Year. Duke’s Class of 2018 read and discussed Americanah as part of its first-year orientation.

In addition to her writing, which includes numerous short stories and essays for publications such as The New Yorker, Adichie reaches a global audience as a feminist activist and speaker. The novelist Dave Eggers wrote of Adichie, “She is the rare novelist to become a public intellectual—as well as a defining voice on race and gender for the digital age.” Her 2012 TEDx talk, “We Should All Be Feminists,” was sampled by Beyoncé on her song “***Flawless”. In the TEDx talk, Adichie tells the story of learning, as a teenager, the definition of feminism as “a person who believes in the social, political, and economic equality of the sexes.” She goes on to say that her own definition has become “a man or a woman who says, ‘Yes, there’s a problem with gender as it is today, and we must fix it; we must do better.’”

Adichie was born in Enugu, Nigeria, where her father was a professor of statistics at the University of Nigeria and her mother was the university registrar. She pursued her education in the United States, earning a B.A. summa cum laude from Eastern Connecticut State University, an M.A. in creative writing from Johns Hopkins University, and an M.A. in African Studies from Yale University. She received a MacArthur Fellowship in 2008, and was elected as a foreign honorary member into both the American Academy of Arts and Letters and the American Academy of Arts and Sciences in 2017. Adichie divides her time between Nigeria and the United States.
Mary Barra is chairman and chief executive officer of General Motors Company. She has served as CEO since 2014 and was elected chair of the Board of Directors in 2016. The first woman to lead a major auto company, she is admired for her discipline and vision, and she is ranked #1 on the lists of the “Most Powerful Women in Business” published by both Forbes and Fortune magazines. In April, Barra was named #11 on Fortune’s list of the “World’s 50 Greatest Leaders.”

Barra began her career with GM in 1980, inspecting hoods and fender panels of the Pontiac Grand Prix as a co-op student at the General Motors Institute. She has spent her entire career with GM; prior to becoming CEO, Barra served as executive vice president for global product development, purchasing and supply chain; and as senior vice president for global product development. In these roles, Barra and her teams were responsible for the design, engineering and quality of GM vehicle launches worldwide. As CEO, she also draws on her experience as an engineer, a plant manager, and the head of corporate human resources. Barra’s career advice for young women is to seize opportunities in order to gain a breadth of experience: “Whatever industry you’re in, really understanding how it works is so critical for advancement. So take those assignments that cause you to step outside of your comfort zone.”

Barra serves on the Stanford University Board of Trustees, the Board of Directors of the Walt Disney Company, the Detroit Economic Club, and the Board of Trustees for Detroit Country Day School. A self-described Camaro enthusiast, she has been known to test out GM vehicles herself at high speeds on the company’s test track.

Barra received her bachelor of science degree in electrical engineering from General Motors Institute (Kettering University) in 1985 and her MBA from Stanford Graduate School of Business in 1990. Mary Barra and her husband Tony are the parents of two Duke undergraduates.
Honorary Degree Recipient

William Vaughn Bell
Doctor of Laws

Faculty Sponsor: Phail Wynn, Jr.

Bill Bell served eight terms as the mayor of Durham from 2001 to 2017, making him the longest-serving mayor in the city’s history.

Bell earned his B.S. from Howard University and his M.S. from New York University, both in electrical engineering. Before becoming mayor, Bell was a member of the Durham County Board of Commissioners from 1972 to 1994 and from 1996 to 2000; he served as the chairman from 1982 to 1994. His professional experience includes his present position as executive vice president and chief operating officer of the UDI Community Development Corporation in Durham and as a retired senior engineer at the IBM Corporation.

Bell cites neighborhood revitalization, the start of a data-driven Poverty Reduction Initiative, and public-private partnerships as his major accomplishments as mayor. Perhaps most visibly, Bell presided over a renaissance of downtown Durham that is now serving as a blueprint for cities nationwide. More than $1.7 billion in public and private money was invested, and more than a million square feet of abandoned tobacco factories have been restored and converted to award-winning restaurants, high-tech start-ups, loft apartments, and science laboratories. Today, the accolades stream in as Durham is routinely recognized as a great place to live, work, and play.

Bell has noted that the relationship between Duke and Durham has never been stronger. Bell forged a partnership with Duke that resulted in the building of the Durham Performing Arts Center and the renovation of the American Tobacco Campus—both of which helped to spark the downtown revival—and today, 3,000 Duke employees work downtown.

“"There used to be a time we visited other cities to try to find out how they did things," Bell said in his last State of the City Address, "but I can tell you, now we’re having more people come to Durham and asking, ‘How did you do it?’”"
Named by *Architectural Digest* as “the most accomplished African-American architect living today,” Philip Freelon led the team of architects on the design of the $500 million Smithsonian National Museum of African American History and Culture in Washington, D.C., which opened in 2016. The new museum on the National Mall was immediately celebrated for its striking beauty and symbolic impact; Freelon has stated that he aimed to “infuse African American and African influences into the building to create a distinctive form.”

The Freelon Group has also served as the design architect for many other cultural and civic buildings, including the National Center for Civil and Human Rights in Atlanta, the Museum of the African Diaspora in San Francisco, the Harvey B. Gantt Center in Charlotte, and two neighborhood libraries for the Washington D.C. Public Library system. Locally, Freelon was responsible for the design of the Durham Transportation Center among other civic facilities and multiple buildings on Duke’s academic and medical campuses. In 2014, Freelon and his firm joined the global architecture and design firm Perkins+Will. Among his many honors and awards, Freelon is a Fellow of the American Institute of Architects (FAIA) and was the 2009 recipient of the AIA Thomas Jefferson Award for Public Architecture. President Obama appointed him to the National Commission of Fine Arts.

Frelon holds a bachelor of environmental design degree in architecture from North Carolina State University and a master of architecture degree from the Massachusetts Institute of Technology. He also received a Loeb Fellowship and spent a year of independent study at the Harvard University Graduate School of Design. He has taught and lectured at N.C. State’s College of Design, Harvard, MIT, and the University of California at Berkeley, among others.

A native of Philadelphia, Freelon lives in Durham and is married to the jazz singer and composer Nnenna Freelon. In December 2016, Phil Freelon announced that he had been diagnosed with ALS. He also launched “Design A World Without ALS,” a fundraising effort to support research at the Duke ALS Clinic and ALS patients and their families.
**Honorary Degree Recipient**

**William G. Kaelin, Jr., M.D.**  
**Doctor of Science**

Faculty Sponsor: Mary E. Klotman

Dr. William Kaelin is a cancer biologist who is a professor in the Department of Medicine at the Dana-Farber Cancer Institute at Harvard Medical School and former associate director for basic science for the Dana-Farber/Harvard Cancer Center. A Howard Hughes Medical Investigator since 1998, Dr. Kaelin conducts research to understand how mutations affecting tumor-suppressor genes cause cancer in order to lay the foundation for new therapies. His work has produced new insights into how cells detect and respond to changes in oxygen, which may prove valuable for treating diseases beyond cancer, such as anemia, heart attacks, and stroke.

Dr. Kaelin received his undergraduate degree from Duke in chemistry and mathematics and his M.D. from Duke University School of Medicine in 1982. He completed his training in internal medicine at the Johns Hopkins Hospital, where he served as chief medical resident. He was a clinical fellow in medical oncology at the Dana-Farber Cancer Institute, during which time he was a McDonnell Scholar. The Duke School of Medicine presented Dr. Kaelin with its Distinguished Alumni Award in 2007.

In 2016, Dr. Kaelin was named a co-recipient of the Albert Lasker Basic Medical Research Award—sometimes called the “American Nobel” because 87 of the honorees have gone on to win the Nobel Prize. His many other honors include the Canada Gairdner International Award, the Grand Prix of the Fondation Lefoulon-Delalande from the Institut de France, and the Wiley Biomedical Research Prize. He has been elected to both the National Academy of Medicine and the National Academy of Science.

A champion of basic research, Dr. Kaelin welcomes the “unanswered questions and unexplained results” that can occur when scientists are led by their curiosity: “We should appreciate that papers strengthen science when they candidly acknowledge limitations and puzzling results.”
Russell M. Robinson II is an attorney, community leader, and philanthropist who has had a significant impact on the state of North Carolina, particularly in higher education. He is the founding partner of Robinson, Bradshaw & Hinson, one of the largest law firms in North Carolina, and the author of *Robinson on North Carolina Corporation Law*, the preeminent book on North Carolina corporation law.

From 1987 to 2017, Robinson served as a trustee of The Duke Endowment, the private foundation established by James B. Duke and based in Charlotte, and he served as chair from 2001 to 2011. He also served as a member and chair of the Board of Trustees of the University of North Carolina at Charlotte from 1987 to 1997; as chair he was the lead advocate for the campus to gain research university status and award doctoral degrees. He was the general counsel for the John Motley Morehead Foundation for 42 years, and he served as a member and chair of the Board of Visitors of Johnson C. Smith University, a historically black university in Charlotte. He has been honored with many awards, including the Judge John J. Parker Award, the highest award by the North Carolina Bar Association, “for conspicuous contributions to the cause of jurisprudence in North Carolina.”

After attending Princeton for two years as an undergraduate, Robinson transferred to Duke in 1952, where he was elected to Phi Beta Kappa and advanced after his junior year through an accelerated program into law school. He received his LL.B. from Duke Law School in 1956; his honors included election to Order of the Coif, the Willis Smith Award for graduating first in the class, and serving as Editor-in-Chief of the *Duke Law Journal*. He later served as a member of the Board of Visitors of the Law School.

Deeksha Malhotra graduates today from Trinity College of Arts and Sciences with a bachelor of science degree in neuroscience and minors in psychology and chemistry. She was elected to Phi Beta Kappa and was awarded distinction for her senior thesis, which was based on two years of cognitive neuroscience research investigating the effects of motivation on natural human exploration and memory.

Deeksha Malhotra
CANDIDATE FOR THE DEGREE OF BACHELOR OF SCIENCE

Deeksha was born in Singapore and grew up in Australia and in Atlanta, Georgia. In the summer after her first year at Duke, she further expanded her horizons by going on a DukeEngage program in Jodhpur, India. Outside the classroom, Deeksha participated in Indian cultural dance teams; served on the executive board for Camp Kesem, a camp for children whose parents have cancer; served as editor-in-chief for Duke’s travel publication, Passport Magazine; and was a resident assistant in Few Residence Hall for two years.

Deeksha plans to spend the next year applying to medical schools, expanding her thesis for publication, and working as a barista. She aspires to a career as a pediatric oncologist and medical journalist.

The Traditions of Commencement

Duke University traces its origin to 1838 when Brown’s Schoolhouse, a one-room log subscription school, expanded to Union Institute upon the uniting of Methodist and Quaker families. Commencement exercises date from 1852 when action of the North Carolina General Assembly authorized the institution to grant degrees. Throughout the years commencement exercises have varied in scope, sometimes offering as much as a week of celebration to the graduates, their families and citizens of rural Randolph County, North Carolina, the site of the predecessor institutions to Duke University. Notable ceremonies in the nineteenth century included those of 1859 when President Braxton Craven presented diplomas reflecting a name change to Trinity College, of 1877 when the first earned M.A. degrees were awarded, and of 1878 when three sisters, Mary, Persis, and Theresa Giles earned degrees, becoming the first women graduates of the College.

The leadership of President John F. Crowell, the donation of land by Julian S. Carr, and the financial assistance of Washington Duke made possible the relocation of Trinity College to Durham in 1892. Within a decade, Trinity College established a reputation for excellence. Commencement ceremonies became more formal under the direction of a college marshal. Caps and gowns appeared, and after 1902, students received Latin honors in recognition of academic achievement. With appropriate ceremony, the college paid homage to Washington Duke, who had died in 1905, with the unveiling of his statue at the commencement of 1908.

From 1910 to 1924, President William Preston Few presided over the development of a particularly strong liberal arts college, and from 1924 until his death in 1940, he directed the successful transition to a complex research university. In December 1924, long-range planning and a lifetime of family philanthropy culminated in the public announcement of a grand design to aid higher education, hospitals, orphanages, and the Methodist Church in North and South Carolina. Acknowledging the unique opportunity for a new identity presented by acceptance of the terms of the indenture of The Duke Endowment, the Board of Trustees of Trinity College enthusiastically agreed to organize a new institution around Trinity College. The enlarged institution was to be known as Duke University in honor of Washington Duke, benefactor and father of Mary, James Buchanan, and Benjamin Newton, all friends of the college in their own way.

Based upon the solid foundation of Trinity College, the University grew spectacularly. The curriculum expanded and succeeding commencement programs noted new degrees: B.D. and M.Ed. in 1927, Ph.D. in 1928, and LL.B. in 1929. M.D. joined the list in 1932, and B.S. in Engineering in 1933, B.S. in Nursing in 1936, and Master of Forestry in 1939. In 1972 the degree of Master of Business Administration, the last curriculum recommended by James B. Duke, joined the list of degrees awarded by Duke University.

The location of the commencement exercises themselves reflects the changing nature of the university. First held in Craven Memorial Auditorium on East Campus, they were moved to West Campus in 1931 and held successively in Page Auditorium and in the outdoor and indoor stadiums. Special ceremonies at commencement have included the laying of the cornerstone of the Gothic campus in 1928, the first use of the Chapel and the inaugural carillon and organ recitals in 1932, and the unveiling of the statue of James B. Duke in 1935. The exigencies of World War II required the awarding of degrees during the year in special ceremonies in a variety of locations.

President Terry Sanford pursued new ways to continue a single university-wide convocation of undergraduate, graduate and professional school students which would still maintain traditional exercises. In a unique format, baccalaureate services are offered three times, and the commencement exercises have now returned to an outdoor setting, first to Wallace Wade Stadium in 1974, to the East Campus quadrangle in 1980, and in 1984 back to the stadium.
Notes About the Program

Duke’s stone carvings have provided a source of conjecture, amusement and even inspiration to the students, staff and visitors who have passed through this Gothic Wonderland. Photos of these carvings are featured throughout this program.

The lists of candidates appearing in this program are not officially certified lists of graduates. Certification must come from the Registrar of the University.
